

Ankiro Site Search - Features

Search

- Wide selection of standard search operators: Boolean (OR/AND, no expansions), must contain (+), must not contain (-), wild card (*) (end of word only), masking (?)
- Fuzzy operators, default (internal only)
- Phrase search ("") (not ignoring stop words)
- Paranteslogik
- Ranking (occurrence, closeness, URL-depth, context(metatags, headings, fonts, etc.), document length)
- Configurable ranking
- Page boosting/Word binding
- Configurable stop words
- Case insensitive

Result Presentation

- Customizable search result (delivered using XML)
- Sorting by relevance, date or meta tag
- Grouping
- Context including search word markup for each result document

Semantics

- Phonetic spellcheck
- Complete DK/NO/UK dictionary with conjugations (better than stemming)
- Complete DK/NO/UK thesaurus with synonyms, etc.
- Geographic "near by" search
- Dictionary and thesaurus adapted to search algorithm use

Indexing

- TXT, HTML, Microsoft (Word, Excel, Powerpoint), PDF (no metatags)
- Frames and iFrames
- Javascript (document.write, m.fl.)
- DHTML/Scripts/CSS
- Scheduling
- Push based indexing
- Indexing rules
- Content filtering
- Categories
- Multiple domains/sites

Integration

- Integrates in any system using HTTP/XML
- Supports webservice architecture
- 100% control of search context including using other search engines

Administration

- Webinterface
- Configurable user levels
- Statistics
